Harwin USB 2.0 Certified Connector

Harwin today announced the launch of USB Type A / Type B and achieving TID certification by USB-IF ensuring compliance to the USB2.0 specification.

This certification is a significant milestone which ensure Harwin has been one step closer of quality assurance yet competitively price at no extra cost.

Harwin saw an opportunity to serve the growing demand of speed and power efficiency enhancements. USB proof to be one of the most successful interface in history as standard IO interconnects widely used in application for industrial, instruments, medical and automotive industry.

Feature & Benefits Include

- Certified to perform as required in USB 2.0 standard
- Perform at transmission speed up to 480mbps with 12,0000 high durability cycles (Type A & B rec.) to meet high-end application
- Two type of metal shield, through hole and SMT versions, PCB mount options.
- Panel Fixing and grounding options, ease of mating and handling
- Design for low skew performances, unique design of the metal shield to prevent short circuit.

Applications:

- Modem
- Portable storage
- Media player
- PC Peripheral
- PDAs
- GPS
- Multimedia Gadget
- Industrial Handheld Device
